

REECE LUCAS

FRONT END DEVELOPER

Employment

Consultant Developer at Deloitte Digital

06/17 – Present

Working as part of a multi-disciplinary team on a large multi-national E-commerce platform. Conducted a comprehensive code audit and performance review. Planned, and currently oversee, a detailed approach for re-factor to address issues with performance, scalability, maintainability and accessibility. Present regularly to stakeholders and product owners. Manage a small team of remote developers. Mentor junior and mid-weight team members.

Lead Front End Developer at Collective London

11/14 – 05/17

Led a small front-end team responsible for the development of builds that ranged from responsive micro-sites to large legacy projects. Utilised modern work-flows including Grunt/Gulp/Webpack, BEM/ITCSS (in SASS and PostCSS), and version control via Git. Worked according to agile methodologies within teams internally and client side. Collaborated with designers and product owners to encourage the adoption of design practices that prioritised performance and accessibility.

UX Research & Design at Meta

11/13 – 08/14

Conducted user research and designed UI changes to address usability ‘pain points’. Created functional prototypes for small-scale A/B testing. Worked in a fast-paced environment in diverse, agile teams. Like all startups, time constraints were tight and responsibilities were varied, requiring a flexible approach and readiness to learn skills outside of the typical remit of a Front End Developer.

Education

Physiological Science – BSc.

First Class Honors

University of Bristol
